Professional Summary

Full-stack software engineer with 4+ years building production web applications using React, Angular, and TypeScript. Specialized in component-driven architecture and API integration, with proven experience delivering scalable systems serving 10,000+ users at Cisco. Strong track record translating Figma designs into pixel-perfect, accessible interfaces while maintaining high code quality and test coverage.

Technical Skills

Frontend: React, Angular (v9-19), HTML/CSS, Bootstrap, TypeScript, JavaScript, Svelte

Backend: Node.js, Go, Python, RESTful APIs, Swagger/OpenAPI

Database: MongoDB, PostgreSQL, MySQL

Cloud & DevOps: AWS (EC2, S3), Docker, Kubernetes, Jenkins

Tools: Git/GitHub, Jest/Vitest, Figma, Jira, Selenium

Professional Experience

Front End Developer | Independent Consultant | April 2024 – Present

- Delivered enterprise Angular 19 applications for Ziro with Bootstrap UI, Selenium testing, and RESTful API integration
- Built mobile-first research platform for UBC tracking video engagement with Firebase, YouTube API, and real-time analytics
- Created responsive applications with React, Angular, and Svelte for e-commerce clients including authentication, dashboards, and data grids
- Implemented client-side state management with localStorage/IndexedDB for offline-first functionality and WCAG compliance

Software Engineer | Cisco Systems | August 2021 – April 2024

- Architected micro-frontend system using React, enabling 5+ teams to deploy independently and reducing conflicts by 80%
- Delivered 15+ Angular components from Figma to production serving 10,000+ users across enterprise platforms
- Automated deployments with Node.js scripts, reducing manual time from 2 hours to 15 minutes per release
- Led Java-to-Go migration for 3 microservices, improving performance 40% and reducing memory 60% with 100% test coverage
- Integrated 8+ microservice APIs using Swagger/OpenAPI, ensuring consistent data flow across distributed systems
- Achieved 90%+ test coverage through TDD practices using Jest, Python, and Go testing frameworks

Full Stack Developer (Internship) | Vinple Inc. | February 2019 – July 2019

- Built cross-platform React Native mobile app achieving feature parity between iOS and Android
- Developed React web features with MongoDB backend for authentication and data management

Education

Bachelor of Science, Computer Engineering | Izmir University of Economics | Graduated June 2018
